# Dry Needling Consent for Treatment

**Please answer the following questions:**

Are you positive for HIV/AIDS?	Yes	No	Do you have a bleeding disorder?	Yes	No
Are you taking blood thinners?	Yes	No	Have you had a previous spinal surgery?	Yes	No
Are you immunocompromised?	Yes	No	Have you had a breast augmentation?	Yes	No

**Procedure:** Dry Needling involves inserting a tiny monofilament needle in a muscle or muscles in order to release shortened bands of muscles and decrease trigger point activity. This can help resolve pain and muscle tension and will promote healing. This is not traditional Chinese Acupuncture, but is instead a medical treatment that relies on a medical diagnosis to be effective. Like any treatment, there are possible complications. While complications are rare in occurrence, they are real and must be considered prior to giving consent for treatment.

**Risks:** The most serious risk with Dry Needling is accidental puncture of a lung (pneumothorax). If this were to occur, it may likely require a chest x-ray and no further treatment. The symptoms of shortness of breath may last for several days to weeks. A more severe puncture can require hospitalization and reinflation of the lung. This is a rare complication, and in skilled hands it should not be a concern.

Other risks include injury to a blood vessel causing a bruising, infection, and/or nerve injury. Bruising is a common occurrence and should not be a concern.

**Patient's Consent:** I understand that no guarantee or assurance has been made as to the results of this procedure and that it may not cure my condition. Multiple treatment sessions may be required/needed. Thus this consent will cover this treatment as well as consecutive treatments by this facility. I have read and fully understand this consent form. With my signature, I hereby consent to the performance of this procedure. I also consent to any measures necessary to correct complications, which may result.

I hereby acknowledge that I have received and reviewed the above policy and asked any questions I have prior to signing.

**You have the right to withdraw consent for this procedure at any time before it is performed.**

# Informed Consent for Treatment

Your Chiropractor specializes in the care of soft tissue injuries utilizing Active Release Techniques (ART) and Sound Assisted Soft Tissue Mobilization (SASTM). The first thing she will do is determine if your problem is muscular by nature. Should you need to see another professional your doctor will notify you as soon as possible. Some conditions may require 2 to 3 weeks to determine if ART or SASTM will be effective for your condition depending on how chronic your condition is.

Your sessions may be uncomfortable. Every individual's tissue tolerance is different. It is your responsibility to communicate with the doctor during and after care to give her feedback so that she can make modifications if necessary. In the event that your skin bruises after a session, communicate this to the provider so that she knows to apply less force in future treatments. She will also inform you if icing the area will help.

It is your responsibility to participate in your care by doing the stretches and exercises that you will be taught. It is also your responsibility to tell your provider whether or not you feel like the care is helping you.

I hereby authorize and release the doctor and any individual he/she may designate as her assistant to administer treatment, physical examination, x-ray studies, chiropractic care or any clinical services that she deems necessary in my case. I understand that, as with any health care procedure, complications are possible following chiropractic manipulation and/or manual therapy techniques. The risks of complications due to chiropractic treatments have been labeled as "rare" and the probability of adverse reaction due to ancillary procedures is also considered "rare".

I hereby acknowledge that if I do not keep appointments as recommended to me by my treating doctor, she has complete right to terminate responsibility for my care and relinquish any disability granted me within a reasonable period of time. I understand that failure to complete my recommended treatment plan may jeopardize my care.
